EDUCATION

University of Colorado Boulder **Boulder, CO**

Bachelor's of Science in Computer Science, Minor in Data Science *Expected Graduation, May 2028*

- **Related Coursework:** Programming for Data Science, Intro to Data Science, Applied Statistics & Probability, Data Structures & Algorithms, Software Development, Computer Systems, Intro to Cybersecurity
- **Organizations:** Women in Computing, SHPE, Lattice First Generation Scholars

Front Range Community College **Longmont, CO**

Associate's of Applied Science in Computer Information Systems *Graduated May 2024*

- **GPA:** 4.0/4.0, *Summa Cum Laude*
- **Related Coursework:** PC Databases, Web Development, Client-side Scripting, Computing in SQL, Database Design, Linux Configuration, Business Fundamentals

EXPERIENCE

Google via Break Through Tech Sprinternship™ **Boulder, CO**

Software Engineering Sprintern *Jul 2026*

- Developed asset_checker.py, a Python script that monitored Cloud Storage for newly uploaded asset reports, transformed raw TXT files into structured JSON, and loaded customer service data into BigQuery.
- Integrated backend functionality into a cloud-native data pipeline, enabling customer service information to be compared against Mandatory Service Announcements within an AI-powered web application.
- Implemented frontend functionality using JavaScript to support interactive MSA status tracking, allowing users to organize notices as New, In Progress, or Dismissed.
- Collaborated with a team of five to develop MSAi Manager, contributing to system architecture discussions, backend integration, and final project presentation

IBM **Longmont, CO**

Talent Strategy Intern *Jun 2023 - Aug 2023*

- Collaborated with an intern team to develop a data-driven workforce strategy focused on improving IBM's recruitment and retention of early-career talent.
- Conducted competitive benchmarking and comparative analysis of talent acquisition and retention practices across leading technology companies, translating research into actionable recommendations.
- Synthesized research findings into presentations delivered to IBM program managers.
- Utilized Microsoft Word and PowerPoint to organize research and communicate insights effectively.

PROJECTS

Fitness Tracking Web Application *Aug 2024 – Dec 2024*

https://github.com/BreHarris0917/gym_Bros#readme

- Collaborated on a 5-person agile team to design and develop a full-stack fitness-tracking web application supporting user profiles, workout logging, and social competition features.
- Designed and implemented the relational SQL database schema, ensuring efficient storage and retrieval of user profiles, workout data, and leaderboard rankings.
- Developed backend integration using Node.js, connecting frontend interfaces to the database and ensuring reliable data flow across application features.

SKILLS

Programming Languages: Python, SQL, C++, JavaScript
Data & Analytics: Pandas, NumPy, scikit-learn, Matplotlib, Data Analysis, Statistical Modeling
Software & Development: Node.js, REST APIs, Git/GitHub, VS Code, Jupyter Notebook
Databases & Cloud: BigQuery, Google Cloud Storage, GCP, AWS, XAMPP
Certifications: Google Cloud Digital Leader, Data Fundamentals, AI Foundations, Cybersecurity Fundamentals
Languages: Spanish (Fluent)
